MEMBER DASHBOARD PREVIEW

PREVIEW · ILLUSTRATIVE FIGURES

# International Council of Nurses

A preview of the dashboard International Council of Nurses would have once its members check in on SURGhub. The figures are illustrative: about 407 invented accounts, processed exactly as real check-ins would be. None of them is real member data.

## What is counted

- Members are SURGhub learners who checked in with your organisation’s code. Membership is self-declared.

- Learning counts from the day a member checked in: enrolments and certificates dated before that day are not included.
- A member who checks out keeps what they did while checked in; nothing after they checked out is counted.
- Check-in and check-out dates are the day SURGhub's records first showed the change, so they can be a day or two late.
- Only totals are shown: no names, emails or individual records. Groups smaller than 10 are not shown on their own.
- Global Surgery Foundation staff and test accounts are left out.

**SURGhub, the UN Global Surgery Learning Hub**, is a joint initiative of the Global Surgery Foundation (GSF) and UNITAR.
